DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 26-41, and 46, drawn to an influenza antigen fusion product, classified in class 424, subclass 192.1.
- II. Claims 42-45, 47-51, drawn to a nucleic acid construct encoding a fusion product, classified in class 536, subclass 23.4.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Although there are no provisions under the section for "Relationship of Inventions" in the MPEP § 806.05 for inventive groups that are directed to different products, restriction is deemed to be proper because these products constitute apparently distinct inventions for the following reasons: all of the products that are claimed to be produced from the organism can be synthetically produced. The nucleic acids from groups II and the polypeptides of group I can be made synthetically. The polypeptides do not require the nucleic acid that encodes them. Also, the polypeptides are structurally and functionally different from the polynucleotides of group II.

In the instant case, the compositions of groups I and II are functionally different and have distinctly different structural components, each having separate fields of search. The product of group I could also be made synthetically.

Art Unit: 1648

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

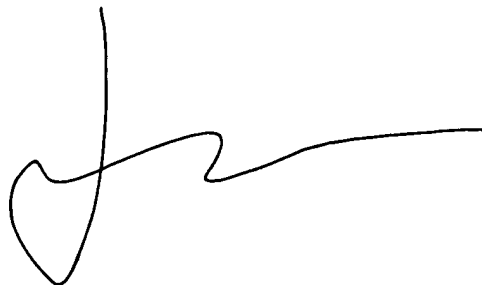

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shanon A. Foley whose telephone number is (703) 308-3983. The examiner can normally be reached on 7:30-4:30 M-F.
